This system helps manage a tyre shop.
It keeps records of:

- Workers 👷
- Attendance 📅
- Products (tyres, items) 🛞
- Sales 💰
- Services 🔧
- Invoices 🧾
- Tyre exports 🚚

🧱 Main Parts of the System

👷 Workers

Stores worker details like:

- Name
- Phone
- Job role
- Daily salary

👉 Used to manage staff.

📅 Attendance

Tracks if a worker is:

- Present
- Half day
- Absent

👉 One worker can have only **one record per day**.

💰 Worker Money Records

1. Advance

- Money given before salary

2. Credit Ledger

- Tracks:
  - Money given (credit)
  - Money returned (settlement)

👉 Helps calculate how much a worker owes.

🛞 Products (Tyres & Items)

Stores:

- Product name
- Buying price
- Selling price
- Available stock

👉 Used for inventory management.

🔄 Stock Movement (Important)

Tracks all stock changes:

- New stock added
- Items sold
- Adjustments

👉 Prevents stock mistakes.

🔧 Services

Two types:

Service Template

- Predefined services (like tyre change)

Service Record

- Actual work done

👉 Example: “Tyre repair done today”

💰 Sales

Records product sales:

- What product sold
- Quantity
- Price
- Profit

👉 Stock reduces when a sale happens.

Additionally sales and services are going with credit

🧾 Invoice

Full bill for a customer.

Includes:

- Customer name
- Vehicle number
- Total amount(sales+services)

📄 Invoice Items

Details inside an invoice:

- Products OR services
- Quantity
- Price

👉 Invoice total = sum of all items

🚚 Tyre Export

Tracks bulk tyre sending to companies:

- Company name
- Number of tyres
- Profit
- Status (Pending, Delivered, Paid)

📊 Export Status History

Tracks status changes:

- When it moved from pending → delivered

👉 Useful for tracking progress

🔗 How Things Connect

- One worker → many attendance records
- One worker → many advances
- One product → many sales
- One invoice → many items
- One export → many status updates

⚙️ Important Rules

✅ A worker can only have **one attendance per day**

✅ Stock should **never go below zero**

✅ Every stock change should be recorded

✅ Profit is calculated from buying & selling price

✅ Invoice total must match item totals

🚀 System Versions

Basic Version

- Workers
- Attendance
- Products
- Sales
- Services
- Invoice
- Export

🧠 Simple Idea

👉 This system helps you:

- Track workers
- Manage stock
- Record sales
- Generate bills
- Monitor business profit
